

SAVI SHAHAN

UNDERGRADUATE – BICT (HONS) | SOFTWARE DEVELOPER | UI/UX DESIGNER

+94 72 547 1160 • savi0204k@gmail.com • Colombo, Sri Lanka

Portfolio: savi0204k-stack.github.io/Portfolio • GitHub: github.com/savi0204k-stack

PROFILE

BICT (Hons) undergraduate at the University of Vavuniya with a strong interest in software development, full-stack engineering and UI/UX design. Experienced in developing academic and practical projects using Java, C#, JavaScript, React, SQL and modern design tools. Combines technical problem-solving with user-centred design to build practical, maintainable and visually engaging digital solutions.

EDUCATION

University of Vavuniya | BICT (Hons) | 2022 – 2027

• Relevant areas: Software Development, Database Systems, Computer Graphics, UI/UX & HCI, Web Development and Systems Analysis & Design.

CP/HZ/Norwood T.M.V | G.C.E. Advanced Level – ICT Student | 2021 – 2023

PROJECTS & TECHNICAL EXPERIENCE

Smart Pharmacy Management System | C# / Windows Forms / SQL Server

- Developed an offline pharmacy management application covering inventory, supplier management, sales and billing workflows.
- Designed database-driven forms and DataGridView interfaces to manage medicines and transaction records efficiently.
- Implemented expiry-alert and stock-management features to support day-to-day pharmacy operations.

FixMate – Home Maintenance Service | UI/UX / Figma

- Designed a user-centred service concept connecting customers with home maintenance professionals.
- Created user flows, wireframes and interactive prototypes in Figma with a focus on simple navigation and usability.

NIC Lost & Found Platform | Web / AI Concept

- Proposed a digital lost-and-found workflow for reporting and recovering National Identity Cards.
- Designed a process for image enhancement, identification of relevant card information, watermarking and secure notifications.

RFID Attendance System | Arduino / ESP8266

- Built an RFID-based attendance prototype using Arduino and ESP8266 hardware.
- Integrated RFID identification with attendance recording and explored LCD-based status feedback.

Smart Medicine Dispenser | Arduino / IoT

- Developed a prototype concept using RTC scheduling, servo control and GSM communication to support timed medicine dispensing.

LEADERSHIP & ACTIVITIES

- IEEE Student Branch involvement through technical, awareness, career and innovation-focused university events.
- Developed and maintained a personal portfolio using GitHub and Vercel, presenting software, UI/UX and technical projects.
- Collaborated on academic software, database, IoT and design projects, contributing to both implementation and presentation.

TECHNICAL SKILLS

Programming: Java, C#, JavaScript, TypeScript, Python

Web & Backend: HTML5, CSS3, React, Next.js, Node.js, Express

Databases: SQL Server, MySQL, MongoDB

Design & Tools: Figma, GitHub, Vercel, Visual Studio, Photoshop, Premiere Pro, Blender

Other: UI/UX, HCI, Computer Graphics, IoT, Arduino, ESP8266, Git

ADDITIONAL

- Languages: English, Tamil, Sinhala
- Interests: UI/UX design, software development, AI, creative technology and visual design
